Re: New Sand and Salt Storage Bin, to the Canyon Fuel Company, LLC, Sufco Mine, Permit

Number C/041/0002

Dear Permit Supervisor:

The enclosed eight complete clean copies of the Sand and Salt Storage Bin are being submitted per the Division's conditional approval letter dated September 8th, 2010. Enclosed are DOGM forms C-1 and C-2 and appropriate pages.

If you have any questions or need additional information, please contact Leland Roberts at (435) 286-4483.

Sincerely,

CANYON FUEL COMPANY, LLC

SUFCO Mine

APPLICATION FOR COAL PERMIT PROCESSING

Permit Change New Permit Renewal Exploration Bond Release Transfer Transfer
Permittee: CANYON FUEL COMPANY, LLC Mine: SUFCO MINE Permit Number: C/041/0002
Title: Sand and Salt Storage Bin
Description, Include reason for application and timing required to implement:
A new conveyer for lump coal and a concrete sand and salt storage bin. Constuction start 10/1/2010
11 new conveyer for rump coar and a concrete sail and sail storage our. Constitution start 10/1/2010
Instructions: If you answer yes to any of the first eight (gray) questions, this application may require Public Notice publication.
Yes No 1. Change in the size of the Permit Area? Acres: Disturbed Area: increase decrease. Yes No 2. Is the application submitted as a result of a Division Order? DO# Yes No 3. Does the application include operations outside a previously identified Cumulative Hydrologic Impact Area? Yes No 4. Does the application include operations in hydrologic basins other than as currently approved? Yes No 5. Does the application result from cancellation, reduction or increase of insurance or reclamation bond? Yes No 6. Does the application require or include public notice publication? Yes No 7. Does the application require or include ownership, control, right-of-entry, or compliance information? Yes No 8. Is proposed activity within 100 feet of a public road or cemetery or 300 feet of an occupied dwelling? Yes No 9. Is the application submitted as a result of a Violation? NOV # Yes No Is the application submitted as a result of other laws or regulations or policies?
Yes No 11. Does the application affect the surface landowner or change the post mining land use? Yes No 12. Does the application require or include underground design or mine sequence and timing? (Modification of R2P2) Yes No 13. Does the application require or include collection and reporting of any baseline information? Yes No 14. Could the application have any effect on wildlife or vegetation outside the current disturbed area? Yes No 15. Does the application require or include soil removal, storage or placement? Yes No 16. Does the application require or include vegetation monitoring, removal or revegetation activities? Yes No 17. Does the application require or include construction, modification, or removal of surface facilities? Yes No 18. Does the application require or include water monitoring, sediment or drainage control measures? Yes No 19. Does the application require or include subsidence control or monitoring? Yes No 20. Does the application require or include subsidence control or monitoring? Yes No 21. Have reclamation costs for bonding been provided? Yes No 22. Does the application involve a perennial stream, a stream buffer zone or discharges to a stream? Yes No 23. Does the appl
Please attach four (4) review copies of the application. If the mine is on or adjacent to Forest Service land please submit five (5) copies, thank you. (These numbers include a copy for the Price Field Office)
I hereby certify that I am a responsible official of the applicant and that the information contained in this application is true and correct to the best of my information and belief in all respects with the laws of Utah in reference to commitments, undertakings, and obligations, herein. Side USFS Public Stock Trail and Link Canyon Road), for the performance of subsidence surveys, or for the collection of environmental monitoring data. These public roads are, therefore, classified as primary roads because they will be retained for an approved postmining land use after mine reclamation.

5.2.7.2 Description of Transportation Facilities

No surface conveyors (other than those in the mine yard immediately adjacent to the portals) or rail systems have been or will be constructed, used, or maintained within the permit area.

Conveyor Specifications. The conveyors within the surface facility complex are used to transport and stockpile coal. These conveyor locations are shown on Plate 5-2A. The No.1 Belt, Loadout Belt, and ROM Belts are 54" covered rigid structure conveyor belts. The Stacker Conveyor and Stoker Belt are 42" covered rigid structure conveyor belts. The Reclaim Belts are 42" uncovered catenary conveyor belts. The lump coal conveyor is a 36" covered rigid structure conveyor belt.

Road Specifications. Cross sections and profiles of roads that are used or maintained by SUFCO Mine are provided on Plate 5-9 and 5-2D. Information regarding road drainage structures is presented in Chapter 7.

The mine access road is a county road that extends from Interstate Highway 70 to the mine (a distance of 9.95 miles). This road is classified as a collector road in the State collector system. It was upgraded from a dirt Forest Service road in 1977.

The Utah Department of Transportation (UDOT) coordinated the upgrade of the road under a contract between Coastal States Energy Company, Sevier County, and UDOT. Coastal States initially paid for the work and was later reimbursed by the state under provisions of the Resource Development Act of 1975.

The road has a 28-foot finished width. The reconstruction consisted of 17.5 inches of untreated base course followed by 2.5 inches of gravel sub-base. The first paving course was a 3-inch bituminous
